PROFESSIONAL SUMMARY

Software Developer with 1+ years of experience building enterprise web applications with Java, Spring Boot, MySQL, and REST APIs, and responsive user interfaces with React.js. Delivered 4+ client web applications and improved query performance by ~35% through transaction-safe database optimization across 3+ modules. Experienced in MVC architecture, role-based access control, Git-based team workflows, and Agile delivery, with hands-on practice hosting and deploying a Java project on AWS.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, HTML5, CSS3
- **Backend Technologies:** Spring Boot, Spring MVC, J2EE, Node.js (Express.js), RESTful APIs, JDBC
- **Frontend Technologies:** React.js, Bootstrap
- **Databases:** MySQL, MongoDB, SQL Query Optimization, Transaction Management, CRUD Operations
- **Tools and Platforms:** Git, GitHub, Postman, VS Code, XAMPP, AWS (hosting and deployment of a Java project)
- **Development Concepts:** MVC Architecture, Authentication and RBAC, Dependency Injection (DI), Inversion of Control (IoC), Clean Code Principles, Agile Development, Microservices (conceptual knowledge)

WORK EXPERIENCE

Software Developer — Suffix E Solutions *Mar 2025 – Present | Kochi, Kerala*

- Designed and developed 4+ enterprise-grade web applications for client business workflows using Java, Spring Boot, MySQL, and REST APIs, with a modular, scalable structure
- Optimized complex SQL queries and implemented transaction-safe database operations, improving query performance by ~35% and eliminating data inconsistency issues across 3+ modules
- Built admin dashboards and backend modules following clean code principles and a modular MVC architecture
- Led Git branching strategy and release cycles for a team of 3, and contributed to deployment pipelines and release management

Software Developer Trainee — Scope India *Sep 2024 – Feb 2025 | Trivandrum, Kerala*

- Developed Java Spring Boot applications with RESTful web services, implementing full CRUD operations and a layered architecture
- Applied Dependency Injection (DI) and Inversion of Control (IoC) to build loosely coupled, testable backend services
- Built responsive React.js user interfaces with consistent cross-device behavior across 5+ projects
- Delivered 4 enterprise-style applications (login systems, blog platforms, task management tools) in 2-week Agile sprints

PROJECTS

AGGE.IN — Membership Management System | *Java, Spring Boot, MySQL* Live: agge.in

- Built a dynamic, membership-based web platform with admin-controlled content management, allowing non-technical administrators to update site content without code changes
- Implemented role-based access control (RBAC), user authentication, and tiered membership plans, with full CRUD operations across Admin and User dashboards
- Delivered CMS-style content management functionality that reduced operational overhead for the client

ThinkSynapseCare — Healthcare Appointment Booking System | *Java, Spring Boot, MySQL* Live: thinksynapsecare.org

- Developed a multi-role healthcare platform with dedicated dashboards for Admins, Doctors, and Patients, covering the end-to-end appointment lifecycle
- Implemented secure session-based authentication, appointment scheduling, and patient record management with full backend CRUD logic

EDUCATION

Master of Business Administration (MBA) — Artificial Intelligence
Amrita Vishwa Vidyapeetham | 2025 – 2027
Currently Pursuing

B.E. Computer Science & Engineering — St. Xavier's Catholic College of Engineering, Tamil Nadu *Aug 2020 – May 2024*
CGPA: 7.89/10 | Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems
Good Shepherd Matric Higher Secondary School — HSC: 76.8% (2019 – 2020) | SSLC: 92% (2017 – 2018)
