SUMMARY

Full-stack Software Developer with hands-on experience building enterprise web applications using Java, Spring Boot, MySQL, RESTful APIs, Hibernate/JPA, and microservices architecture. Proven ability to deliver scalable, maintainable systems through clean architecture, transaction-safe database design, and responsive frontend development. Experienced in Agile environments, Git-based collaboration, and end-to-end deployment. Adept at working across the stack to deliver high-quality solutions in fast-paced, client-facing settings.

EXPERIENCE

Suffix E Solutions Mar. 2025 – Present
Software Developer *Kochi, Kerala*

- Designed and developed 4+ enterprise-grade web applications serving client business workflows using **Java, Spring Boot, MySQL, and REST APIs**, delivering modular, scalable solutions for client requirements
- Implemented **transaction-safe database operations** and optimized complex SQL queries, improving query performance by ~35% and eliminating data inconsistency issues across 3+ modules
- Architected and built **admin dashboards and backend modules** adhering to clean code principles and modular MVC architecture
- Led Git-based version control workflows across a team of 3, managing branching strategy and release cycles and actively contributed to deployment pipelines and release management activities

Scope India Sept. 2024 – Feb. 2025
Software Developer Trainee *Trivandrum, Kerala*

- Developed **Java Spring Boot** applications with RESTful web services, implementing full CRUD operations and robust layered architecture
- Applied core Spring concepts including **Dependency Injection (DI) and Inversion of Control (IoC)** to build loosely coupled, testable backend services
- Built responsive UIs using React.js, achieving consistent cross-device compatibility across 5+ projects, improving user experience across multiple projects
- Delivered 4 enterprise-style mini applications within Agile sprint cycles averaging 2 weeks — including login systems, blog platforms, and task management tools — following **Agile development practices**

PROJECTS

AGGE.IN | *Dynamic Membership Management System* | Live

- Built a fully dynamic, **membership-based web platform** with admin-controlled content management, enabling non-technical administrators to update site content without code changes
- Implemented **role-based access control (RBAC)**, user authentication, and tiered membership plans with full CRUD operations on Admin and User dashboards
- Delivered CMS-like content management functionality, significantly reducing operational overhead for the client

ThinkSynapseCare | *Healthcare Appointment Booking System* | Live

- Developed a multi-role healthcare platform with dedicated dashboards for **Admins, Doctors, and Patients**, supporting end-to-end appointment lifecycle management
- Implemented secure **session-based authentication**, appointment scheduling, patient record management, and booking operations with full backend CRUD logic

TeamWeb | *Company Portfolio Website* | Live

- **Tech Stack:** HTML5, CSS3, JavaScript, PHP
- Designed and developed a fully responsive company portfolio website with backend contact form processing and server-side input validation

EDUCATION

St. Xavier's Catholic College of Engineering Aug. 2020 – May 2024
*Bachelor of Engineering in Computer Science & Engineering | CGPA: **7.89/10*** *Tamil Nadu*

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems

Good Shepherd Matric Higher Secondary School 2019 – 2020
*HSC | Percentage: **76.8%***

Good Shepherd Matric Higher Secondary School 2017 – 2018
*SSLC | Percentage: **92%***

TECHNICAL SKILLS

Programming & Frameworks : Java, J2EE, Spring Boot, Spring MVC, Node.js (Express.js)

Backend & Databases : RESTful APIs, JDBC, MySQL, MongoDB, Transaction Management, CRUD Operations, Enterprise Application Development

Frontend : HTML5, CSS3, React.js, Bootstrap, JavaScript

DevOps & Tools : Git, GitHub, Postman, VS Code, XAMPP

Concepts & Practices : MVC Architecture, Dependency Injection (DI), Inversion of Control (IoC), Clean Code Principles, Agile Development, Debugging & Code Optimization
